Monografía

The Arab Human Development Report Series aims at building human development in the Arab world. 2003 Report surveys the most salient trends that influenced the process of human development in 2002-2003 and provides a thorough analysis of one of the major challenges the Region faces: its growing knowledge gap. The Report evaluates the current production of knowledge, examines the sociological context of knowledge acquisition, and highlights the landmarks necessary to establish a knowledge-based society in the Arab countries
