Monografía

"Seventeen-year-old Starr Hughes hasn't believed in magic since the day her mother died. As an aspiring reporter, the only thing she cares about is cold, hard facts. So when she hears the popular kids at school (the It-Squad) are about to start a secret game, she wants every detail, especially since she has a major crush on gorgeous Dylan Winchester. Hiding under the headmaster's desk, planting bugs, and breaking into a classmate's home are all on her to-do list. With her boy-crazy best friend Lily at her side, Starr discovers that witches are not only real, but they also need her help. Someone is using the game to steal their memories, their powers, and perhaps even their lives"--
