Título: The Mathematical Theory of Finite Element Methods Recurso electrónico] by Susanne C. Brenner, L. Ridgway Scott

Editorial: New York, NY Springer New York Imprint: Springer 1994

Descripción física: XII, 294 p. online resource

Tipo Audiovisual: Appl.Mathematics/Computational Methods of Engineering Engineering mathematics Mathematical Methods in Physics Mathematical physics Mathematics Numerical Analysis Numerical analysis Numerical and Computational Physics

Mención de serie: Texts in Applied Mathematics 0939-2475 15

Contenido: Contents: Basic Concepts -- Sobolev Spaces -- Variational Formulation of Elliptic Boundary Value Problems -- The Construction of a Finite Element Space -- Polynomial Approximation Theory in Sobolev Spaces -- n-Dimensional Variational Problems -- Variational Approximation of Poisson's Equation -- Finite Element Multigrid Methods -- Max-norm Estimates -- Variational Crimes -- Applications to Planar Elasticity -- Mixed Methods -- Iterative Techniques for Mixed Methods -- Applications of Operator-Interpolation Theory

ISBN: 9781475743388 978-1-4757-4338-8

Autores: Scott, L. Ridgway., author

Entidades: SpringerLink (Online service)

Punto acceso adicional serie-Título: Texts in applied mathematics 0939-2475 15
