Título: The Mathematical Theory of Finite Element Methods Recurso electrónico] by Susanne C. Brenner, L. Ridgway Scott

Edición: 2nd ed

Editorial: New York, NY Springer New York Imprint: Springer 2002

Descripción física: XV, 363 p. online resource

Tipo Audiovisual: Computational Intelligence Computational Mathematics and Numerical Analysis Computer science Mathematics Engineering Functional Analysis Functional analysis Mathematics Mechanics, applied Theoretical and Applied Mechanics

Mención de serie: Texts in Applied Mathematics 0939-2475 15

Contenido: Preface(2nd ed.) -- Preface(1st ed.) -- Basic Concepts -- Sobolev Spaces -- Variational Formulation of Elliptic Boundary Value Problems -- The Construction of a Finite Element of Space -- Polynomial Approximation Theory in Sobolev Spaces -- n-Dimensional Variational Problems -- Finite Element Multigrid Methods -- Additive Schwarz Preconditioners -- Max-norm Estimates -- Adaptive Meshes -- Variational Crimes -- Applications to Planar Elasticity -- Mixed Methods -- Iterative Techniques for Mixed Methods -- Applications of Operator-Interpolation Theory -- References -- Index

ISBN: 9781475736588

Autores: Scott, L. Ridgway., author

Entidades: SpringerLink (Online service)
