Sage Publications,
 1993

Monografía

Aimed at helping the researcher select the most appropriate measure of association for two or more variables, the author clearly describes such techniques as Spearman's rho, Kendall's tau, Goodman and Kruskals' gamma and Somer's d and carefully explains the calculation procedures as well as the substantive meaning of each measure

Título: Nonparametric measures of association Jean Dickinson Gibbons

Editorial: Newbury Park, Calif. Sage Publications 1993

Descripción física: 1 online resource (vi, 97 pages) illustrations

Tipo Audiovisual: Social sciences Statistics

Mención de serie: A Sage university papers series. Quantitative applications in the social sciences no. 07-091

Bibliografía: Includes bibliographical references (pages 94-96)

Contenido: Introduction -- Spearman's Rho and Kendall's tau as descriptive measures of association -- Inferences based on Rho and Tau -- Kendall's coefficient of concordance -- Partial correlation -- Measures of association in ordered contingency tables -- Summary

Lengua: English
