

The Brain teaching modules /

Annenberg/CPB,
1997

Digital video Streaming multimedia Video recordings for the hearing impaired. Video recordings for the hearing impaired. Vidéos pour personnes ayant une déficience auditive.

Material Proyactable

Developed from the original series, "The Brain", these flexible resources offer extensive footage and research into the inner workings of the human brain, including findings on Alzheimer's disease, schizophrenia, autism, Parkinson's disease, and many other topics. The modules are appropriate for use in general and advanced courses in psychology, abnormal and physiological psychology, neuropsychology, and occupational therapy
