Aesthetic Rejuvenation of the Face and Neck presents the latest surgical and non-surgical techniques used in facial aesthetic rejuvenation. In the current environment of "lunchtime facelifts" and "light lifts" that often produce poor results, this book fulfills the need for a text that takes a careful, detailed approach to describing high-quality aesthetic facial rejuvenation procedures. Dr. Connell, the senior editor, is a recognized world expert on facial rejuvenation surgery, and his co-authors offer a wide range of perspectives and expertise in the specialty
