Monografía

Computer-mediated communication (CMC) technologies such as electronic mail, bulletin board services, computer conferencing systems, and the World Wide Web are having a profound effect on education. Learning Networks is a complete guide to the use of these new technologies at the primary, secondary, university, and adult education levels. Drawing on the authors' own considerable experience of teaching and learning online, it describes the learning networks that are available as well as new examples of learning networks that can be created

Título: Learning networks a field guide to teaching and learning online Linda Harasim [and others]

Editorial: Cambridge, Mass. MIT Press 1995

Descripción física: 1 online resource (x, 329 pages) illustrations

Tipo Audiovisual: Enseñanza asistida por ordenador Redes informáticas

Bibliografía: Includes bibliographical references (pages 313-323) and index

Contenido: I. The field -- 1. Learning networks: An introduction -- 2. Networks for schools: Exemplars and experiences -- 3. Networks for higher education, training, and informal learning: Exemplars and experiences -- II. The guide -- 4. Designs for learning networks -- 5. Getting started: The implementation process -- 6. Teaching online -- 7. Learning online -- 8. Problems in paradise: Expect the best, prepare for the worst -- III. The future -- 9. New directions -- 10. Network learning: A paradigm for the twenty-first century -- 11. Epilogue: Email from the future

Lengua: English
