Biografías Dictionarios

Monografía

Like its successful predecessors 10x10 (published in 2000) and 10x10_2 (published in 2005), 10x10_3 is a comprehensive overview of contemporary world architecture. Generously illustrated, this volume presents 100 of the world's most exceptional emerging architects, selected by 10 esteemed members of the international architecture community. Arranged alphabetically by architect, the book features more than 1,500 illustrations and approximately 250 buildings and projects from the past five years, including recently built work as well as competition entries. The result will be an up-to-the-minute collection representing the best of both global and regional architecture around the world. A global overview of contemporary architecture selected by ten prominent members of the international architecture community Following on from the successful 10x10 and 10x10_2, features the work of 100 rising stars and a variety of buildings from private houses and apartments to schools, offices and stadia Features projects that redefine architecture, exploring never-before-used materials and proving that green is the new standard in innovative design A must-have for anyone wanting to keep up to date with the future of architecture
