Título: Anaerobic digestion processes, products and applications editors, Daniel J. Caruana and Amanda E. Olsen

Editorial: New York Nova Biomedical Nova Science Publishers [2012]

Descripción física: xii, 185 p.

Mención de serie: Environmental science, engineering and technology series

Bibliografía: Incluye referencias bibliográficas al final de cada capítulo e índice

Contenido: Anaerobic Treatment of Domestic Wastewater / J.A. Álvarez, M. Soto -- Effect of Anaerobic Pretreatment by Dry Batch Technology on Aerobic Degradability of Sewage Sludge / Beatrix Rózsáné Szucs, Miklós Simon, György Füleky -- Real Time Identification for the Hydrogen Anaerobic Production Process Based on Multiple Differential Neural Networks and Takagi-Sugeno Fuzzy Decision Method / I. Salgado, R. Fuentes, M. Alfaro, R. Cando, L. Viana, I. Chairez -- A Scientific Review of the Agronomic, Environmental and Social Benefits of Anaerobic Digestion / D.I. Massé, G. Talbot, Y. Gilbert -- Anaerobic Digestion: Processes, Products, and Applications / Abdul-Sattar Nizami -- Microbial Aspects of Anaerobic Digestion for Biogas Production / A.B. Chaudhari, P.C. Suryawanshi, R.M. Kothari

ISBN: 978-1-61324-420-3

Materia: Digestión anaerobia

Autores: Caruana, Daniel J., ed. lit Olsen, Amanda E., ed. lit

Punto acceso adicional serie-Título: Environmental science, engineering and technology series
