

Bioaccumulation - New Aspects and Developments [

Beek, B.,
editor

Springer Berlin Heidelberg,
2000

Libros electrónicos

Monografía

The bioaccumulation of endocrine disruptors, persistent organic chemicals and other compounds of high environmental impact has become of increasing interest in most recent environmental research, risk analysis and toxicology. This volume gives an up-to-date overview and introduces the reader to the new concept of "internal effect concentration" linking bioaccumulation and biomagnification in the food chain to ecotoxicology and risk assessment

Título: Bioaccumulation - New Aspects and Developments recurso electrónico] edited by B. Beek

Editorial: Berlin, Heidelberg Springer Berlin Heidelberg 2000

Descripción física: XIV, 284 p. online resource

Variantes del título: With contributions by numerous experts

Mención de serie: Earth and Environmental Science (Springer-11646) The Handbook of Environmental Chemistry, Vol. 2 Series: Reactions and Processes 1433-6839 2J

Documento fuente: Springer eBooks

Contenido: H.J. Geyer, G.G. Rimkus, I. Scheunert, A. Kaune, A. Kettrup, M. Zeeman, D.C.G. Muir, L.G. Hansen and D. Mackay: Bioaccumulation and Occurrence of Endocrine-disrupting Chemicals (EDCs), Persistent Organic Pollutants (POPs), and Other Organic Compounds in Fish and Other Organisms Including Humans -- D.T.H.M. Sijm and J.L.M. Hermens: Internal Effect Concentration: Link Between Bioaccumulation and Ecotoxicity for Organic Chemicals -- J. Paasivirta: Long-term Effects of Bioaccumulation in Ecosystems -- B. Beek, S. Böhling, U. Bruckmann, Ch. Franke, U. Jöhncke and G. Studinger: The Assessment of Bioaccumulation

ISBN: 9783540680918 978-3-540-68091-8

Materia: Climatic changes Ecology Environmental management Environmental pollution Environmental sciences

Autores: Beek, B., editor
