Sage Publications, 1993

Monografía

This book makes a significant contribution towards understanding the new class structures of post-industrial societies and the changing processes of social stratification and mobility. Drawing together comparative research on the dynamics of social stratification in a number of key western societies, the authors develop a framework for the analysis of post-industrial class formation. They illustrate the significance of the relations between the welfare state and the household, and the critical interface between gender and class. Case studies of the USA, the UK, Canada, Germany, Norway and Sweden
