

Identification for Automotive Systems [

Alberer, Daniel

Springer London,
2012

Monografía

Increasing complexity and performance and reliability expectations make modeling of automotive system both more difficult and more urgent. Automotive control has slowly evolved from an add-on to classical engine and vehicle design to a key technology to enforce consumption, pollution and safety limits. Modeling, however, is still mainly based on classical methods, even though much progress has been done in the identification community to speed it up and improve it. This book, the product of a workshop of representatives of different communities, offers an insight on how to close the gap and exploit this progress for the next generations of vehicles

Título: Identification for Automotive Systems Recurso electrónico-En línea] edited by Daniel Alberer, Håkan Hjalmarsson, Luigi IRe

Editorial: London Springer London 2012

Descripción física: XVI, 356p. 172 illus., 129 illus. in color. digital

Tipo Audiovisual: Engineering Systems theory Engineering Automotive Engineering Systems Theory, Control Control

Mención de serie: Lecture Notes in Control and Information Sciences 0170-8643 418

Documento fuente: Springer eBooks

Nota general: Engineering (Springer-11647)

Contenido: From the Contents: Challenges and Opportunities for Identification Methods in Automotive Systems -- A Desired Modelling Environment for Automotive Powetrain Controls -- An Overview on System Identification Problems in Vehicle Chassis Control -- Linear Parameter-varying System Identification: The Subspace Approach -- A Tutorial on Numerical Methods for State and Parameter Estimation in Nonlinear Dynamic Systems -- Using Genetic Programming in Nonlinear Model Identification -- Markov Chain Modelling and On-board Identification for Automotive Vehicles

Restricciones de acceso: Accesible sólo para usuarios de la UPV

Tipo recurso electrónico: Recurso a texto completo

Detalles del sistema: Forma de acceso: Web

ISBN: 9781447122210 978-1-4471-2221-0

Autores: Hjalmarsson, Håkan IRe, Luigi

Entidades: SpringerLink (Servicio en línea)

Enlace a formato físico adicional: Printed edition 9781447122203

Punto acceso adicional serie-Título: Lecture Notes in Control and Information Sciences 0170-8643 418
