

Integral representation theory [applications to convexity, Banach spaces and potential theory /

Lukes, Jaroslav (1940-)

Walter de Gruyter, c2010

Monografía

This ambitious and substantial monograph, written by prominent experts in the field, presents the state of the art of convexity, with an emphasis on the interplay between convex analysis and potential theory; more particularly, between Choquet theory and the Dirichlet problem. The book is unique and self-contained, and it covers a wide range of applications which will appeal to many readers

Título: Integral representation theory [Recurso electrónico] applications to convexity, Banach spaces and potential theory Jaroslav Lukes ... [et al.].

Editorial: Berlin New York Walter de Gruyter c2010

Descripción física: xvi, 715 p.

Mención de serie: EBSCO Academic eBook Collection Complete De Gruyter studies in mathematics 35

Bibliografía: Incluye referencias bibliográficas (p. 669-694) e índice

Contenido: Compact convex sets -- Choquet theory of function spaces -- Affine functions on compact convex sets -- Perfect classes of functions and representation of affine functions -- Simplicial function spaces -- Choquet theory of function cones -- Choquet-like sets -- Topologies on boundaries -- Deeper results on function spaces and compact convex sets -- Continuous and measurable selectors -- Constructions of function spaces -- Function spaces in potential theory and the Dirichlet problem -- Applications

Detalles del sistema: Forma de acceso: World Wide Web

ISBN: 9783110203219 3110203219 9783110203202 3110203200

Autores: Lukes, Jaroslav (1940-)
